

Hydrogen Ecosystem

End-to-end for every stage of operations.

Electrolyzers

We're advancing hydrogen technology to decarbonize everything from trains and trucks to power grids. And it all starts with hydrogen production.

Transport & Storage

Hydrogen is safely stored and transported via industry-leading NPROXX composite Type 4 vessels.

Fuel Cell Mobile

Our fuel cells offer the industry's highest power density and increased durability, even in high-stress environments.

Fuel Cell Stationary

We offer flexible onsite solutions for ultimate energy management and sustainability – while eliminating outages and downtime.

Electrolyzers

Market	Customers	Products
Green Ammonia	Project Developers / Energy-Related Companies	HyLYZER®-5000
Hydrogen Refueling Stations	Private Fleet Owners / Oil and Gas Companies / Project Developers	HySTAT®-100 HyLYZER®-500
Large Industry	Steel Industry / Chemicals Industry / Gas Companies / Project Developers	HyLYZER®-1000 HyLYZER®-5000
E-fuels	Oil Companies / Project Developers	HyLYZER®-1000 HyLYZER®-5000
Renewables	Wind and Solar Companies / Project Developers / Energy-Related Companies	HyLYZER®-500 HyLYZER®-1000 HyLYZER®-5000

Fuel Cells Mobile

Transport & Storage

Market	Customers	Products
Heavy Duty & Medium Duty Trucks	Long-Haul Transport / Regional Distribution / Communal Refuse Trucks	HyPM-HD30 HyPM-HD45 FCE150 Gen 4+ FCE300 Gen 4+
Bus	Intercity and Coach	FCE150 Gen 4+ (Transit) FCE300 Gen 4+ (Coach)
Rail	Passenger / Shunter / Locomotive (Freight and Passenger)	HyPM-HD40 HyPM-HD45 FCE150 Gen 4+ FCE300 Gen 4+
Marine	Passenger / Offshore / Transport / Government	HyPM-HD45 FCE150 Gen 4+ FCE300 Gen 4+
Off-Highway Construction	Wheel Loaders / Excavators / Haulers	FCE150 Gen 4+ FCE300 Gen 4+

Fuel Cells Stationary

Transport & Storage

Market	Customers	Products
Backup Power Source	Industry / Data Centers / Hospitals / Schools / Power Grids	PEM Solutions
Prime Power Source	Large-Scale Industry / Power Grids	Solid Oxide Fuel Cell (SOFC) Solutions

We are Accelera

And we're on a mission to transition the world's most economically critical industries to zero-emissions power.
